

Barcan+Kirby

'Why Barcan+Kirby?' video transcript

Samantha: "I think what people can gain from instructing Barcan and Kirby as opposed to a larger more corporate firm, is that they get to know us through the legal process."

Rich: "What truly sets Barcan and Kirby apart from other law firms is that going above and beyond is ingrained in everything that we do and that's born from our values."

Georgina: "The fact that we have a huge range of expertise across not just the personal services side but the commercial side as well is what makes us quite unique as a law firm."

James: "We really care about people and I think that reflects in the service we provide. We live our values and we try and let our values shine through in everything we do."

Rich: "We care about the work that we do whether it's litigation, preparing a Will, or you're selling or buying a business. We are fully committed to what we're expected to do for our clients."

Georgina: "I don't think I've ever worked somewhere where there has been so much focus on doing the right thing and making sure that we are very clear on the right thing to do for clients; that integrity as a value is absolutely core to being a lawyer at Barcan and Kirby."

Samantha: "We have different departments that provide different expertise that can service those clients' needs and we're able to work closely with different teams within the firm in order to achieve the holistic legal solution for that client. It's really important to us that our clients feel valued and that they feel they're getting a top-notch legal service from Barcan and Kirby."

Georgina: "The clients here are so important. Everything is about the client; client first all the time. So you get pretty much a big corporate law firm service on the commercial side but in a really friendly and approachable way."

Jon: "It's a well-driven, well-organised firm but with a very caring side to it. Barcan and Kirby is not just, you know, a medium-sized law firm in Bristol but it's invested in the local community which it serves."
